

# Kindergarten content for Annual report 2019

## 1. Introduction

Being well aware of the fact that children in the present times are more sensitive, with a very high self-esteem and practice independent thinking, the educators at SanAcademy Group of Schools get the best out of the children through the positive reinforcement of good work and good behavior. Believing in the notion that every child is unique in nature with varying needs, they foster a conducive environment full of love, care, motivation and creativity, and instill in the children a desire to learn with emphasis on their social, emotional, physical, aesthetic, intellectual and developmental aspects, rather than criticism, fear and punishment.

Bent on exploring the journey of education by providing enrichment through values and exposure to varied learning opportunities with an emphasis on holistic education, San Academy Group of Schools has a proud academic tradition which maximizes every learning opportunity to shape the students' future through high-quality, values-enriched teaching and learning. Giving exposure and extending various platforms to exhibit the innate talents of children is the prime principle of San Academy institutions.

Under the exemplary leadership of Ms. R. Archana the Director, every child is considered as a unique divine blessing by the educators at San Academy who consistently attempt to nurture the amazing abilities of the children. Such an endeavour is enabling each one of them to achieve the best in their lives as San Academy feels that every child has something great in store for future. More to add, Ms. Archana strongly

believes in the students' freedom of action and thought, and is consistently working with an aim of taking her schools to the pinnacle of glory, by making the children excel in all the arenas. Considering every student as an unpolished stone when she or he enters into the school, she feels that it is the school's dedicated mission to shape them into dazzling diamonds in facing the futuristic challenges of the complex and competitive world. According to her, every SAN-ite should love the school and be always eager to be a part its success story. She also insists on making the learning environment conducive and productive with the help of audio-visual aids, computers, smart boards, etc. and constantly focuses on faculty development through upgrading of teaching skills in terms of matter as well as manner at regular intervals.

## 2. Awards and recognition:

We love student contests and competitions because they can provide an authentic learning purpose. In other words, they can connect students' interests to the real world. San Kindergarten has pulled together a list of amazing contests to engage every kind of student in the classroom.

## 3. Curriculum and teaching:

The kindergarten curriculum is child centered and follows thematic activity based learning. It is an innovative implementation of themes with fun filled learning activities like special events, games, space exploration, scientists and inventions, etc. Here learning experience is joyful and successful. We believe that the listening, reading and writing skill of the child would reach its highest potential in a friendly child-centric environment. Thus activities are designed to give each child varied experiences to mature physically, intellectually, emotionally and socially at a rate that matches his or her unique abilities and developmental progress.

Nursery-

Transition for children from spending time at home to begin spending it at school with peers begins in our Nursery. The little kids learn to share and care for others, social and cognitive development are emphasized.

Jr Kindergarten-

The child is transitioned gradually from an informal to formal classroom setting. They are encouraged to communicate more vocally to express their thoughts in words.

Sr Kindergarten-

A more formal setting is introduced. Written communication and basic arithmetic sense is introduced.

24 .Activities:( special activities)

We need to consider that young children learn in quite different ways. They learn by comparing physical experiences , by interactions with other people and their own feelings. And they learn an enormous amount through their imagination . Play is what pulls together the logical and creative parts of the brain.

Theme based activities are planned for the children of Nursery to Sr Kindergarten to enhance their understanding of the themes and provide hands on experience.
